KYNAR AQUATEC®

TECHNICAL DATA SHEET

KYNAR AQUATEC® FMA-12

FLUORINATED POLYMER EMULSION

KYNAR AQUATEC® is an innovative platform of emulsions, which are used by paint formulators to make premium weatherable water-based coatings. Coatings formulated with these emulsions can provide the durability and performance of traditional KYNAR 500® based coatings. They can easily be applied to a variety of substrates, including metals, plastics, wood, concrete, textiles, and previously painted surfaces. Now, the extreme weatherability of a KYNAR 500® based coating is available in a VOC-compliant, field or factory applied, ambient air-dry system. Additional benefits include tremendous resistance to dirt pick-up, outstanding water repellency, and high initial and long-term Total Solar Reflectance and Emissivity.

TYPE

PVDF

MAIN APPLICATIONS

- automotive and transportation
- protective coating
- paints
- coil

DELIVERY FORM

- Latex

TRANSFORMATION PROCESSES

- Injection Molding

PACKAGING

Available packaging:
- 1135 kg / 2500 lb IBC
- 225 kg / 500 lb metal drum
- 23 kg / 50 lb metal drum
- 4.5 kg / 10 lb pail
- 500 g / 1 lb pail

SPECIAL CHARACTERISTICS

- Flame & smoke

Headquarters: Arkema France
